

BOOMERANG

Boomerang is a chair that can fit harmoniously with various spaces or stand out on its own.

Boomerang is a unique accent armchair unlike anything else. It is a design by Cristina de la Rosa, a new designer who has joined Fama team, bringing a vision of her universe of light, dreamlike forms inspired by nature. We are confident that she will bring new designs that will captivate us and allow us to enjoy her great talent.

Boomerang is a visually distinct and lightweight piece. Its modern aesthetic, with the exposed wood frame, represents an innovative advancement in the Fama furniture line and style. Boomerang is a chair that can fit harmoniously with various spaces or stand out on its own.

Inspired by this design, we are already working on a large family of home products, including tables and chairs, outdoor elements, and even lamps and other accessories.
